Yuma County.

From the Yuma Sentinel.

We are informed by Joe Swope, of Kansas City, Mo., that he met Lang & Son in Los Angeles. They were just starting out overland with teams, for Benson and Wilcox in this Territory, where they propose to start a drive of 1200 to 1500 head of cattle across the Colorado river valley from Yuma to Carriso Creek. Mr. Lang took 650 head of cattle across the desert last February and as there is an abundance of feed and water, they propose to repeat the experiment the coming season. It now looks as if the desert trail was a pretty well established fact. Vail & Co. will also send some large drives across to Warner's ranch in San Diego county. Well posted parties believe that the great flood of this year resulted in the production of more good pasture than for many years. The water supply will be sufficient for the next three or four years. The cattle trail, if a success, will be a great help to Yuma.

VALUABLE NICKEL.

Reason for the Immense Appropriation Made for it in Congress.

From the El Paso Tribune.

Are we on the eve of a foreign war? One would suppose so from certain mysterious remarks made on the floor of the House and Senate by members of the Naval Committees. The occasion of these remarks was a joint resolution introduced and passed within a week, appropriating \$1,000,000 to purchase all of the nickel the Canadian mines, which supply the world with that metal, can produce for some time to come, to be used in connection with steel in making armor plates for the cruisers now being built. The members of the committee talked mysteriously of the urgent necessity of the immediate appropriation of this money in order to enable the Government to control the supply of nickel and prevent its going elsewhere, and they must have talked much plainer privately, for the opposition, which was at first formidable, quickly disappeared.

On Saturday, just before the passage of the resolution, Senator Gorman stated that he had opposed it the day before, but that he had been assured that its passage was an absolute necessity in the interest of the public service, and he would support it. It was really given, and it has already been signed by the President. The cause of this unusual haste was the recent tests of metal armor by the Navy Department, which proved that only the plates composed of nickel and steel could stand shot fired from improved guns.

It was stated privately that a representative of the Krupps had attempted to purchase the entire products of nickel mines for some European power, presumably England or Germany, but that the owners, being citizens of the United States, patriotically gave this government the first chance to corner the world's supply of nickel.

ROBINSON'S CIRCUS.

The Great Show Gives Two Performances in Phoenix.

Robinson's Great Shows gave two performances yesterday, the magnitude of which has never been before conceived by the native Phoenixians. There were acres of canvas, the main tent being 500 feet long and 200 feet in width, with three rings and a track for racing encircling them all. Continuous exhibition was given simultaneously in all of the rings.

There were elephants and camels, sacred cattle and monstrous horses, monkeys, birds and animals of every description from every part of the world. A giraffe standing nineteen feet in height, the only living one traveling in America and valued at \$20,000, was one of the greatest attractions.

The sideshows, with the giants and dwarfs, snake charmers and snakes, living skeletons and fat people, all held the small boy aghast.

The grand parade was made through the city at 10 a. m. and was a very attractive feature.

The shows perform tonight at Tucson.
